

Hello,I am writting in to say that as an XM subscriber I would like to continue to recieve Traffic and Weather as an option from them. While I don't have the option at this time in the Louisville, KY listening market, I could have that option in the future.

Local channels cut to commercials or other programming (i.e.- news, "joke of the day", etc.) while I stuck in traffic wondering what's going on. More options is ALWAYS better.

Thank You for taking the time to read my opinion.

Jamie Harrison
